XR-C543SP

SERVICE MANUAL

East European Model

Refer to RM-X2S/X3S SERVICE MANUAL (9-960-039-□□) issued previously for information of remote commander (RM-X2S) supplied with this set.

Dolby noise reduction manufactured under license from Dolby Laboratories Licensing Corporation.
"DOLBY" and the double-D symbol □□ are trademarks of Dolby Laboratories Licensing Corporation.

Model Name Using Similar Mechanism	XR-C553SP
Tape Transport Mechanism Type	MG-52A-135

SPECIFICATIONS

Cassette player section

Tape track	4-track 2-channel stereo
Wow and flutter	0.08% (WRMS)
Frequency response	30 – 20,000 Hz
Signal-to-noise ratio	

Cassette type	Dolby B NR	Dolby NR off
TYPE II, IV	67 dB	61 dB
TYPE I	64 dB	58 dB

Tuner section

*FM**

Turning range	65.0 – 74.0 MHz (at 30 kHz step) 87.5 – 108.0 MHz (at 50 kHz step)
Aerial terminal	External aerial connector
Intermediate frequency	10.7 MHz
Usable sensitivity	8 dBf
Selectivity	75 dB at 400 kHz
Signal-to-noise ratio	65 dB (stereo), 68 dB (mono)
Harmonic distortion at 1 kHz	0.5% (stereo), 0.3% (mono)
Separation	35 dB at 1 kHz
Frequency response	30 – 15,000 Hz
Capture ratio	2 dB

* There are the numerical values mesured at 87.5 – 108.0 MHz.

MW/LW

Tuning range	MW: 531 – 1,602 kHz LW: 153 – 281 kHz
Aerial terminal	External aerial connector
Intermediate frequency	10.71 MHz/450 kHz
Sensitivity	MW: 30 µV LW: 50 µV

Power amplifier section

Outputs	Speaker outputs (sure seal connectors)
Speaker impedance	4 – 8 ohms
Maximum power output	35 W × 4 (at 4 ohms)

General

Outputs	Power amplifier control lead/Power aerial control lead/Telephone mute control lead Line out (2)
Tone controls	Bass ± 8 dB at 100 Hz Treble ± 8 dB at 10 kHz
Power requirements	12 V DC car battery (negative ground)
Dimensions	Approx. 188 × 58 × 183 mm (w/h/d)
Mounting dimensions	Approx. 182 × 53 × 164 mm (w/h/d)
Mass	Approx. 1.6 kg
Supplied accessories	Parts for installation and connections (1 set) Rotary commander RM-X2S

Design and specifications are subject to change without notice.

SERVICING NOTES

Flexible Circuit Board Repairing

- Keep the temperature of the soldering iron around 270 ˚C during repairing.
- Do not touch the soldering iron on the same conductor of the circuit board (within 3 times).
- Be careful not to apply force on the conductor when soldering or unsoldering

Notes on chip component replacement

- Never reuse a disconnected chip component.
- Notice that the minus side of a tantalum capacitor may be damaged by heat.

CAUTION

Danger of explosion if battery is incorrectly replaced.
Replace only with the same or equivalent type recommended by the manufacturer.
Discard used batteries according to the manufacturer's instructions.

ADVARSEL!

Lithiumbatteri-Eksplosionsfare ved fejlagtig håndtering.
Udskiftning må kun ske med batteri
af samme fabrikat og type.
Levér det brugte batteri tilbage til leverandøren.

ADVARSEL

Eksplosjonsfare ved feilaktig skifte av batteri.
Benytt samme batteritype eller en tilsvarende type
anbefalt av apparatfabrikanten.
Brukte batterier kasseres i henhold til fabrikantens
instruksjoner.

VARNING

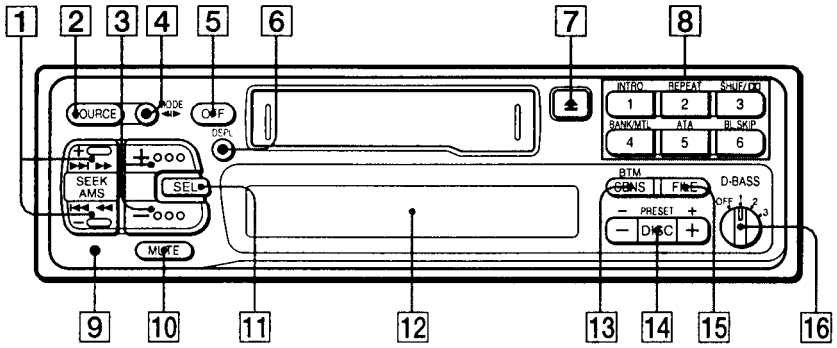
Explosionsfara vid felaktigt batteribyte.
Använd samma batterityp eller en likvärdig typ som
rekommenderas av apparattillverkaren.
Kassera använt batteri enligt gällande föreskrifter.

VAROITUS

Paristo voi räjähtää, jos se on virheellisesti asennettu.
Vaihda paristo ainoastaan laitevalmistajan suosittelemaan tyyppiin.
Hävitä käytetty paristo valmistajan ohjeiden mukaisesti.

This section is extracted from instruction manual.

Location of controls



Refer to the pages for further details.

1 **SEEK/AMS button 4, 5, 6, 7, 10, 11, 13**

2 **SOURCE button (TAPE/TUNER/CD/MD) 4, 6, 10, 12**

3 **⊕⊖ (volume/bass/treble/balance/ fader control) button 7, 8, 9, 12**

4 **MODE (◄I►) button**
During tuner reception:
BAND select 6

During Tape playback:
Transport direction change 4

During CD/MD playback:
CD/MD Changer select 10

5 **OFF button 4**

6 **DSPL (display mode change) button 5, 7, 10, 12**

7 **⏏ (eject) button 4**

8 **During radio reception:**
Preset number buttons 6

During tape/CD/MD playback:
① **INTRO button 5, 11**
② **REPEAT button 5, 11**
③ **SHUF DD (Shuffle/Dolby B NR) button 5, 11**
④ **BANK/MTL (Bank/Metal) button 5**
⑤ **ATA (Automatic Tuner Activation) button 5**
⑥ **BL.SKIP (Blank Skip) button 5**

9 **Reset button 4**
Press this button when you use this unit for the first time, when you have changed the car battery, or when the buttons of this unit do not function properly.

10 **MUTE button 9**

11 **SEL (Control mode select) button 4, 8, 9, 10, 12, 13**

12 **Display window**

13 **SENS/BTM (Sensitivity adjust/Best tuning memory) button 6, 7**

14 **PRESET/DISC button**
During tuner reception:
Preset station select 6

During CD/MD playback:
Disc select 11

15 **FILE button 7, 8, 12, 13**

16 **D-BASS control 9**

Installation Montaż Инсталиране Üzembehelyezés Установка

Precautions

- Choose the installation location carefully so that the unit will not hamper the driver during driving.
- Avoid installing the unit where it would be subject to high temperatures, such as from direct sunlight or hot air from the heater, or where it would be subject to dust, dirt or excessive vibration.
- Use only the supplied mounting hardware for a safe and secure installation.

Mounting angle adjustment

Adjust the mounting angle to less than 20°.

Zasady bezpieczeństwa

- Miejsce do wmontowania radia wybrać z namysłem. Sprzęt nie może bowiem przeszkadzać kierowcy podczas jazdy.
- Nie należy umieszczać sprzętu w miejscach narażonych na działanie wysokich temperatur, jak na przykład bezpośrednich promieni słonecznych lub gorącego powietrza z ogrzewania samochodu lub w miejscach silnie zakurzonych, silnie zabrudzonych lub narażonych na silne wstrząsy.
- Dla zapewnienia bezpiecznej i prawidłowej instalacji stosować wyłącznie załączone części.

Wymierzenie kąta montażowego

Kąt montażowy nie powinien wynosić mniej niż 20°.

Мерки за безопасност

- Изберете внимателно мястото за инсталиране, така че апаратът да не пречи на водача по време на управление на автомобила.
- Избягвайте инсталиране на апарата там, където той ще бъде изложен на високи температури, например на директна слънчева светлина или на горещ въздух от нагревател, или където ще е изложен на прах, замърсяване или силни вибрации.
- Използувайте само доставяните с апарата детайли за монтиране за сигурно и безопасно инсталиране.

Настройка на ъгъла за монтаж

Настройте ъгъла за монтаж да бъде по-малък от 20° градуса.

Biztonsági előírások

- Kérjük gondosan válassza ki a készülék helyét, úgy, hogy az ne akadályozza a vezetőt vezetés közben.
- Kérjük, olyan helyen helyezze el a készüléket, ahol nincs kitéve magas hőmérsékletnek, tehát közvetlen napfénynek, vagy a fűtőegységből kiáradó forró levegőnek és ahol nincs kitéve pornak, ill. erős rázkódásnak.
- A biztonságos üzembehelyezés érdekében kérjük, hogy csak a készülékkel szállított szerelő-készletet használja.

A beszerelési szög beállítása

A készüléket max. 20°-os döntéssel szerelje be.

Меры предосторожности

- Выбирайте место установки таким образом, чтобы прибор не препятствовал водителю во время управления автомобилем.
- Предотвращайте установку прибора там, где он может быть подвержен высоким температурам, например, от прямого солнечного света или горячего воздуха из печки, или там, где возможны воздействия пыли, влаги или сильной вибрации.
- Для безопасной установки используйте только входящее в комплект монтажное оборудование.

Подстройка угла монтажа

Угол монтажа выберите меньшим, чем 20°.

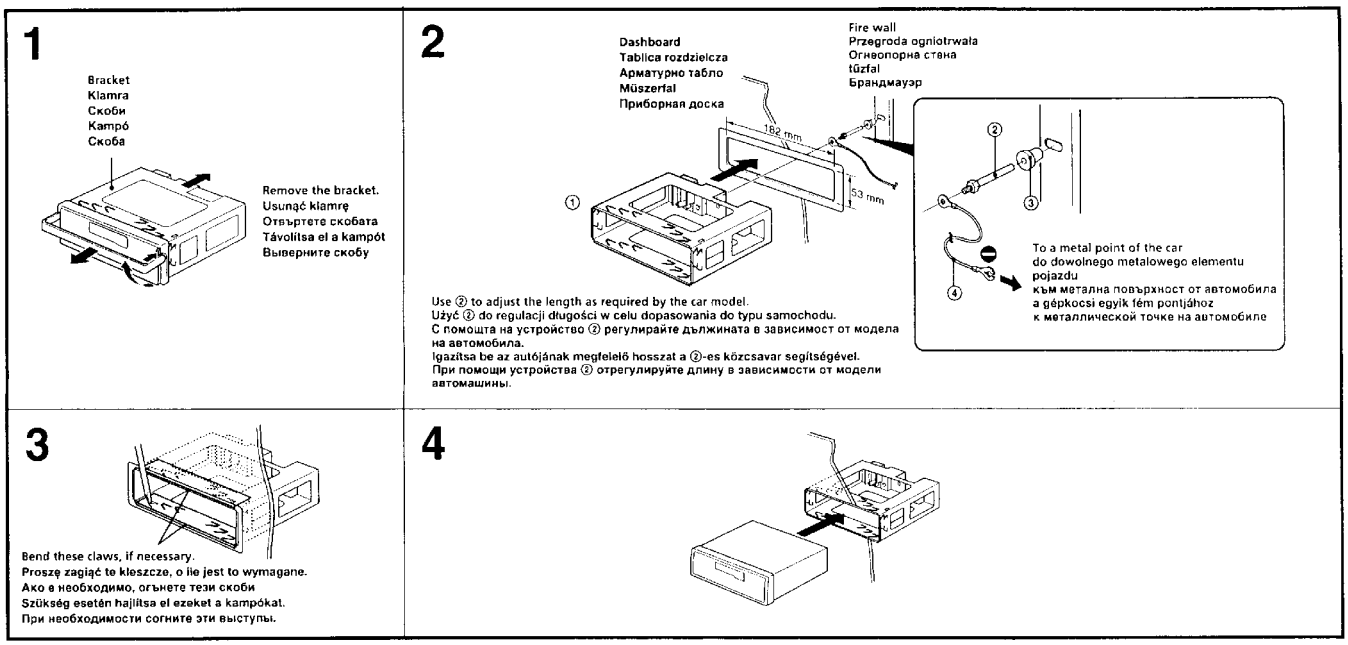
Szerelési példa

A készülék beszerelése a műszerfalba

Пример монтажа

Установка в приборной доске



Note for Connecting

If there is alternator noise (a whining sound when raising engine speed), earth the bracket ① by connecting it to a metal point of the car with the supplied chassis earth cord ④. Connect the earth cord to the bracket with part ② as shown in the step 2.

Uwagi dotyczące podłączenia

Przy wystąpieniu szmerów pochodzących z prądnicy (wysokie tony przy zwiększonych obrotach silnika), należy uziemić wspornik oznaczony ① przez podłączenie do metalowej części pojazdu przy pomocy dostarczonego kabla uziemiającego karoserię ④. Kabel uziemiający proszę podłączyć do wspornika częścią oznaczoną na rysunku cyfrą ②, jak zilustrowano w etapie 2.

Забележка по свързването

В случай, че се появи шум от алтернатора (свистене при повишаване на оборотите), заземете конзолата ① като я свържете към метална повърхност от автомобила с помощта на доставяния заземяващ кабел ④. Свържете заземяващия кабел към конзолата с помощта на детайл ② по начина, показан в стъпка 2.

Tudnivaló a csatlakoztatásról

Ha generátor zajt hall (a motor fordulatszámának növelése közben fellépő sivító hang), földelje le az ① tartókeretet - csatlakoztassa a mellékelt ④ alváz földelővezetéket a gépkocsi egyik fém pontjához. A földelővezetéket a 2. lépésben leírtak szerint a ② elem segítségével rögzítse a tartókerethez.

Примечание по подключению

Если генератор издает шум (воющий звук при наборе скорости), заземлите скобу ①, соединив ее металлической точкой на автомобиле с помощью входящего в комплект заземляющего провода ④. Соедините заземляющий провод со скобой с помощью части ② как показано в шаге 2.

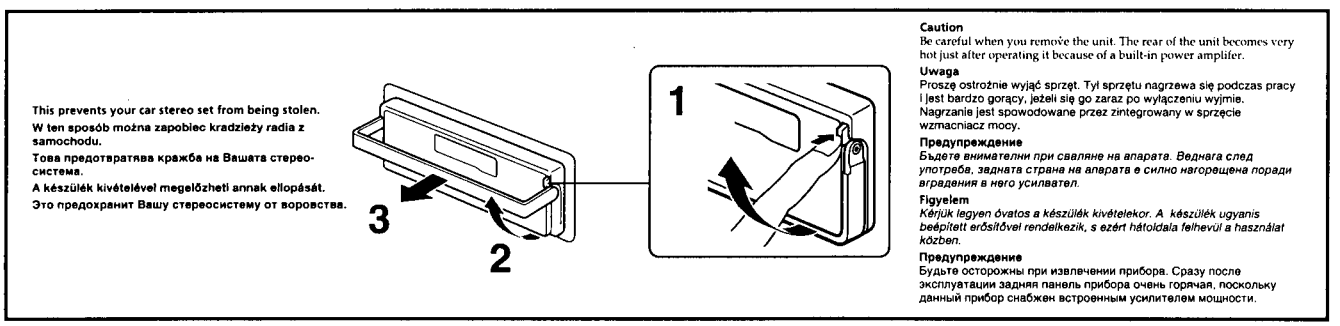
Removing the Unit

Wyjmowanie sprzętu

Сваляне на апарата

A készülék kivétele

Извлечение прибора



This prevents your car stereo set from being stolen.
W ten sposób można zapobiec kradzieży radia z samochodu.
Това предотвратява кражба на Вашата стерео-система.
A készülék kivételével megelőzheti annak ellopását.
Это предохранит Вашу стереосистему от воровства.
3
2
1

Caution
Be careful when you remove the unit. The rear of the unit becomes very hot just after operating it because of a built-in power amplifier.

Uwaga
Proszę ostrożnie wyjąć sprzęt. Tył sprzętu nagrzewa się podczas pracy i jest bardzo gorący, jeżeli się go zaraz po wyłączeniu wyjmie. Nagrzanie jest spowodowane przez zintegrowany w sprzęcie wzmacniacz mocy.

Предупреждение
Бъдете внимателни при сваляне на апарата. Веднага след употреба, задната страна на апарата е силно нагорещена поради вградения в него усилвател.

Figyelem
Kérjük legyen óvatos a készülék kivételekor. A készülék ugyanis beépített erősítővel rendelkezik, s ezért hátoldala felhevül a használat közben.

Предупреждение
Будьте осторожны при извлечении прибора. Сразу после эксплуатации задняя панель прибора очень горячая, поскольку данный прибор снабжен встроенным усилителем мощности.

Connections

Caution

- This unit is designed for negative ground 12 V DC operation only.
- Before making connections, disconnect the ground terminal of the car battery to avoid short circuits.
- Connect the **yellow** and **red** power input leads only after all other leads have been connected.
- Be sure to connect the red power input lead to the positive 12 V power terminal which is energized when the ignition key is in the accessory position.
- **Run all earth wires to a common earth point.**
- Connect the yellow cord to a free car circuit rated higher than the unit's fuse rating.
  If you connect this unit in series with other stereo components, the car circuit they are connected to must be rated higher than the sum of the individual component's fuse rating.
  If there are no car circuits rated as high as the unit's fuse rating, connect the unit directly to the battery.
  If no car circuits are available for connecting this unit, connect the unit to a car circuit rated higher than the unit's fuse rating in such a way that if the unit blows its fuse, no other circuits will be cut off.

Reset button

When the installation and connections are complete, be sure to press the reset button with a ballpoint pen etc.

Notes on the control leads

- *The power antenna control lead (blue) supplies +12 V DC when you turn on the tuner or when you activate the ATA (Automatic Tuner Activation) Function.*
- *A power antenna without a relay box cannot be used with this unit.*

Memory hold connection

When the yellow power input lead is connected, power will always be supplied to the memory circuit even when the ignition key is turned off.

Notes on speaker connection

- *Before connecting the speakers, turn the unit off.*
- *Use speakers with an impedance of 4 to 8 ohms, and with adequate power handling capacities. Otherwise, the speakers may be damaged.*
- *Do not connect the terminals of the speaker system to the car chassis, and do not connect the terminals of the right speaker with those of the left speaker.*
- *Do not attempt to connect the speakers in parallel.*
- *Do not connect any active speakers (with built-in amplifiers) to the speaker terminals of the unit. Doing so may damage the active speakers. Therefore, be sure to connect passive speakers to these terminals.*

Wykonanie podłączeń

Zasady bezpieczeństwa

- Niniejszy sprzęt jest przeznaczony wyłącznie do pracy przy zasilaniu prądem stałym o 12 V i ujemnym uziemieniu.
- Proszę przed wykonaniem podłączeń odłączyć uziemienie akumulatora, aby zapobiec wystąpieniu zwarcia.
- **Żółty i czerwony** wejściowy przewód zasilający proszę podłączyć dopiero po podłączeniu wszystkich innych przewodów.
- Czerwony przewód zasilający należy koniecznie podłączyć do końcówki +12 V, która jest zasilana zawsze po przekręceniu kluczyka w stacyjce do położenia, w którym włącza się zasilanie przyrządów.
- **Wszystkie przewody uziemiające należy poprowadzić do wspólnego miejsca uziemienia.**
- Proszę podłączyć żółty przewód do wolnego obwodu pojazdu o wyższej niż znamionowa moc nominalna bezpiecznika nabytego sprzętu. Jeżeli urządzenie zostanie podłączone w serii do innych komponentów zestawu stereo, proszę się upewnić, że samochodowy obwód mocy posiada wyższą od sumy znamionowej mocy nominalnej bezpieczników poszczególnych komponentów zestawu. Jeżeli nie ma odpowiedniego wolnego obwodu o mocy znamionowej wyższej niż nominalna moc znamionowa bezpiecznika sprzętu, proszę sprzęt podłączyć bezpośrednio do akumulatora. W przypadku gdy w samochodzie nie ma wolnych obwodów o wyższej od bezpiecznika sprzętu nominalnej mocy znamionowej, proszę sprzęt podłączyć w taki sposób, aby ewentualne przepalenie bezpiecznika sprzętu, nie spowodowało odcięcia pozostałych obwodów mocy w samochodzie.

Przycisk Reset

Po zakończeniu montażu i podłączenia radia należy pamiętać o wciśnięciu przy pomocy długopisu itp. przycisku reset (powrót do pierwotnego ustawienia).

Uwagi na temat przewodów zasilania

- *Przewód zasilania anteny automatycznej (niebieski) dostarcza prąd stały +12 V DC po włączeniu radia lub po uruchomieniu funkcji ATA.*
- *W połączeniu z tym radiem nie można korzystać z automatycznej anteny nie posiadającej skrzynki przekaźnikowej.*

Zasilanie pamięci sprzętu

Jeżeli podłączyło się żółty wejściowy przewód zasilający, obwód pamięci będzie zawsze zasilany, nawet po wyłączeniu stacyjki.

Uwagi na temat podłączania głośników

- *Przed podłączeniem głośników należy wyłączyć sprzęt.*
- *Należy stosować głośniki o impedancji od 4 do 8 omów, posiadające odpowiednią obciążalność mocową, ponieważ w przeciwnym wypadku można uszkodzić głośniki.*
- *Nie należy podłączać przewodów układu głośników do podwozia pojazdu, ani też podłączać przyłączy prawego głośnika do przyłączy lewego głośnika.*
- *Nie należy podłączać głośników równolegle.*
- *Do gniazd sprzętu przeznaczonych dla podłączenia głośników nie należy podłączać głośników aktywnych (z wbudowanymi wzmacniaczami), ponieważ może to prowadzić do ich uszkodzenia. Dlatego też należy podłączać wyłącznie głośniki pasywne do tych gniazd.*

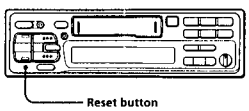
Свързване

Предупреждение

- Този апарат е конструиран за работа само с прав ток 12 V и заземяване на отрицателната клема.
- Преди да направите свързването откачете заземяващата клема на акумулатора на автомобила, за да избегнете къси съединения.
- Свържете **жълтия и червен** захранващи проводници само след като сте свързали всички останали проводници.
- Уверете се, че със сигурност свързвате червения захранващ проводник към положителната клема с 12 V, към която се подава ток при положение на ключа за запалване за спомагателни уреди.
- **Подведете всички заземяващи проводници към обща заземяваща точка.**
- Свържете жълтия проводник към свободна електрическа верига на автомобила с параметри, надхвърлящи тези на ел. предпазител на апарата. В случай, че свържете този апарат последователно с друго стерео оборудване, параметрите на електрическата верига към която те са свързани трябва да надхвърлят сумата от параметрите на ел. предпазители на отделните компоненти. В случай, че автомобила няма ел. верига с параметри, които са по-големи от тези на ел. предпазител на апарата, свържете апарата директно към акумулаторната батерия. В случай, че няма свободни ел. вериги на автомобила, свържете апарата към ел. верига с параметри по-големи от тези на ел. предпазител по такъв начин, че ако изгори ел. предпазител на апарата да не бъде прекъсната нито една друга ел. верига.

Бутон Reset

След като завършите инсталирането и свързването, обезателно натиснете бутона за промяна на настройката с върха на химикалка или нещо друго.



Reset button
Przycisk Reset
Бутон Reset
Reset gomb
Клавиша переустановки

Забележки по проводниците за управление

- *Проводникът за управление на автоматичната антена (син) подава + 12 V прав ток, когато включите апарата, или ако сте активирали функцията ATA (Automatic Tuner Activation).*
- *Автоматична антена без релейна кутия не може да бъде използувана с този апарат.*

Свързване за поддържане на паметта

Когато е свързан жълтия захранващ проводник, към интегралната схема за паметта се подава винаги ток, дори когато ключът за запалване е в изключено положение.

Забележки по свързване на високоговорителите

- *Преди да свържете високоговорителите изключете апарата.*
- *Използувайте високоговорители само със съпротивление от 4 до 8 ома и с мощност, която отговаря на мощността на усилвателя. В противен случай може да повредите високоговорителите.*
- *Не свързвайте клемите на системата на високоговорителите към шасито на автомобила, както и не свързвайте една с друга клемите на десния и на левия високоговорител.*
- *Не се опитвайте да свързвате високоговорителите успоредно.*
- *Въобще не свързвайте никакви активни високоговорители (с вградени усилватели) към клемите за високоговорители на апарата. Ако направите това ще повредите активните високоговорители. Поради това се убедете, че свързвате пасивни високоговорители към клемите на апарата.*

Csatlakozások

Figyelem

- Ez a készülék csak 12 V-os negatív földelésű, egyenáramú akkumulátorról üzemeltethető.
- Egy esetleges rövidzárlat elkerülése érdekében vegye le az autó akkumulátorának csatlakozóját a készülék bekötése előtt.
- A **sárga** és a **piros** színű tápvezetéket csak az összes többi vezeték bekötése után csatlakoztassa.
- A piros vezetéket ahhoz a +12V-os csatlakozási ponthoz csatlakoztassa, mely áramot kap, ha az indítókulcs félig van elfordítva.
- **Az összes földelővezetéket közös földelőponthoz csatlakoztassa.**
- A sárga huzalt a gépjárművön olyan szabad áramkörre kösse be, melynek névleges terhelhetősége magasabb, mint amire a készülék biztosítva van. Ha ezt az egységet más sztereo készülékkel köti sorba, akkor annak az áramkörnek a terhelhetősége, melyre a készülékek rá vannak kötve, magasabb kell hogy legyen, mint az egyes készülékek biztosíték-áramainak összege. Ha a jármű nem rendelkezik olyan áramkörrel, melynek terhelhetősége eléri az egység biztosíték-áramát, akkor kösse az egységet közvetlenül az akkumulátorra. Ha nincs olyan szabad áramkör a gépjárművön, mely alkalmas lenne a készülék bekötésére, akkor a készüléket olyan áramkörre kösse be, mely olymódon rendelkezik magasabb terhelhetőséggel, mint amire a készülék biztosítva van, hogy ha a készülék kioldja a biztosítékot, más áramkörök ezzel nem záródnak le.

Reset gomb

Ha befejezte készüléke beszerelését és csatlakoztatását, feltétlenül nyomja meg a reset gombot egy golyóstollal, vagy más hasonló eszközzel.

Tudnivalók a vezérlővezetékekről

- *A motoros antenna vezérlővezetéke (kék) +12 V egyenfeszültséget kap, ha bekapcsolja a készüléket vagy az ATA (automatikus rádió aktivizálás) funkciót.*
- *Ha a készülékhez motoros antennát csatlakoztat, úgy kizárólag relédobozzal felszerelt motoros antennát használjon.*

Memória megtartás

Ha csatlakoztatja a sárga tápvezetéket, úgy folyamatosan feszültség alatt marad a memória áramkör, még akkor is, ha kikapcsolja a gyújtást.

Tudnivalók a hangszórók csatlakoztatásáról

- *Kérjük kapcsolja ki a készüléket a hangszórók csatlakoztatása előtt.*
- *4-8 ohm impedanciájú, megfelelő teljesítményű hangszórókat használjon, ellenkező esetben ugyanis előfordulhat, hogy a hangszórók károsodnak.*
- *Ne csatlakoztassa a hangszórókat az autó fém szerkezetéhez és ne csatlakoztassa a jobb hangszórót a bal hangszóróhoz.*
- *A hangszórókat semmi esetre se kösse be párhuzamosan.*
- *Ne csatlakoztasson aktív (beépített erősítővel felszerelt) hangszórókat a készülékhez, ellenkező esetben ugyanis károsodhatnak az aktív hangszórók. A készülékhez csak passzív hangszórókat szabad csatlakoztatni.*

Соединения

Предостережение

- Данный прибор сконструирован только для эксплуатации на минусе с постоянным напряжением 12 В.
- Перед подключением отсоедините заземляющую клемму автомобильного аккумулятора для предотвращения короткого замыкания.
- **Желтый и красный** сетевые провода подсоединяйте только после того, как все остальные провода подсоединены.
- Красный сетевой провод подключайте к положительной клемме 12 В, которая находится под напряжением, когда ключ зажигания в промежуточной позиции.
- **Все заземляющие провода соедините с подходящей точкой на массе.**
- Соедините желтый провод со свободным контуром на автомобиле, имеющим большую мощность, чем плавкий предохранитель прибора. Если Вы подключаете этот прибор вместе с другими стереокомпонентами, контуры автомобиля, к которым они подключены, должны иметь большую мощность, чем сумма мощностей плавких предохранителей отдельных компонентов. Если ни один из контуров автомобиля не имеет мощности плавкого предохранителя прибора, подключите прибор непосредственно к аккумулятору. Если на автомобиле для подключения прибора не осталось свободного контура, подключите прибор к любому контуру, имеющему большую мощность, чем плавкий предохранитель прибора таким образом, чтобы при сгорании предохранителя не были разомкнуты другие контуры.

Клавиша переустановки

Когда установка и подключения завершены, нажмите клавишу переустановки с помощью шариковой ручки и т.д.

Примечания по управляющим проводам

- *Провод, управляющий питанием антенны (голубой) подает постоянное напряжение + 12 В, если Вы включили прибор или если Вы включили функцию ATA (Автоматическая Активация Тюнера).*
- *Электрическая антенна без коробки реле не может быть использована с данным прибором.*

Соединение поддержки памяти

Если желтый сетевой провод подключен, питание будет подаваться для поддержки памяти всегда, даже при выключенном зажигании.

Примечания по подключению громкоговорителей

- *Перед подключением громкоговорителей выключите прибор.*
- *Используйте громкоговорители с сопротивлением от 4 до 8 Ом и с адекватной мощностью. Иначе громкоговорители могут быть повреждены.*
- *Не подсоединяйте клеммы громкоговорителей на массу и не соединяйте клеммы правых громкоговорителей с клеммами левых.*
- *Не пытайтесь подключить громкоговорители параллельно.*
- *Не подключайте активные громкоговорители (со встроенным усилителем) к клеммам громкоговорителей на приборе. Это может повредить активные громкоговорители. Поэтому убедитесь, что подключаете пассивные громкоговорители к данным клеммам.*

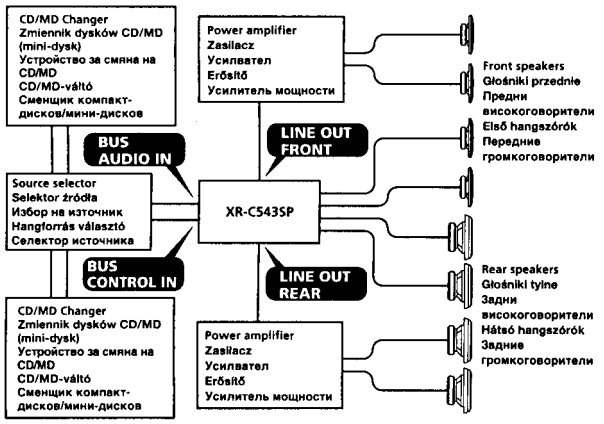
Example 2/Przykład nr 2/Пример 2/2. példa/Пример 2



For connecting two or more changers, the source selector XA-C30 (optional) and the BUS cable RC-61 (1 m) or RC-62 (2 m) (optional) are necessary.

Aby podłączyć dwa lub więcej zmienników niezbędne są selektory źródła zasilania XA-C30 (opcja) oraz łącze BUS RC-61 (1 m) lub RC-62 (2 m) (opcja).

За свързване на два или повече източника са необходими устройство за избор на източника XA-C30 (опция), както и BUS кабел RC-61 (1 м.) или RC-62 (2 м.) (опция).

Két vagy több váltó bekötéséhez használja a külön megvásárolandó XA-C30 cikkszámú forrásválasztót és az RC-61 cikkszámú (1m-es), vagy RC-62 cikkszámú (2 m-es) BUS-kábelt.

При подключении двух или более сменщиков необходим селектор источника XA-C30 (дополнительное оборудование) и кабель BUS RC-61 (1 м) или RC-62 (2 м) (дополнительное оборудование).

Note for Connecting

If there is alternator noise (a whining sound when raising engine speed), ground the bracket by connecting it to a metal point of the car with the supplied chassis ground cord Ⓐ. Connect the ground cord to the bracket with part Ⓑ as shown in the illustration.

Remarque sur le raccordement

Si l'alternateur génère des interférences (pleurage lorsque le régime moteur augmente), reliez le support à la masse en le raccordant à un point métallique de la voiture au moyen du fil de masse pour châssis Ⓐ fourni. Raccordez le fil de masse au support au moyen de la pièce Ⓑ comme indiqué dans l'illustration.

Nota sobre conexión

Si el alternador produce ruido (un zumbido al aumentar la velocidad del motor), conecte el soporte a tierra y, para ello, enchúfelo a un punto metálico del automóvil con el cable de toma a tierra de chasis Ⓐ suministrado. Conecte el cable de toma a tierra al soporte con la parte Ⓑ como muestra la ilustración.

Bağlantı Notları

Eğer ekstra bir parazit varsa (motor hızını artırdığınızda bir vınlama sesi gibi), kızağı, birlikte sunulan kasa topraklama teli Ⓐ ile arabanın metal bir noktasına bağlayarak topraklayınız.
Topraklama telini kızağa Ⓑ parçasını kullanarak şekildeki gibi bağlayınız.

Uwagi dotyczące podłączenia

W razie wystąpienia szmerów pochodzących z prądnicy (wysokie tony przy zwiększonych obrotach silnika), należy uziemić wspornik przez podłączenie dostarczonego kabla uziemiającego Ⓐ do dowolnego metalowego elementu pojazdu. Podłączyć kabel uziemienia do wspornika przy użyciu elementu oznaczonego na rysunku cyfrę Ⓑ.

Забележка по свързването

В случай, че се появи шум от алтернатора (свистене при повишаване на оборотите), заземете конзолата като я свържете с помощта на доставения с апарата заземяващ проводник Ⓐ към метална повърхност от автомобила. Извършете свързването на заземяващия проводник към конзолата с помощта на детайла Ⓑ както е показано на фигурата.

Tudnivaló a csatlakoztatásról

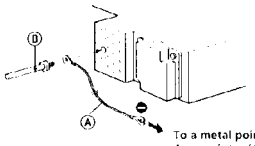
Ha gyorsítás (a motor fordulatszámának növelése) közben sivító zajt hall, földelje le a tartókeretet csatlakoztassa a mellékelt alaplemez földelő vezetéket Ⓐ a gépkocsi egyik fém pontjához. A földelővezetéket az ábra alapján a Ⓑ-vel jelölt elemmel rögzítse a tartókerethez, az ábra alapján.

Примечание по подключению

Если генератор издает шум (воющий звук при наборе скорости), заземлите скобу, соединив его с металлической точкой на автомобиле с помощью входящего в комплект заземляющего провода Ⓐ. Соедините заземляющий провод со скобой с помощью части Ⓑ как показано на иллюстрации.

ملاحظة للتوصيل

اذا صدرت ضوضاء عن المولد (صوت طنين عند زيادة سرعة المحرك)، قم بتأريض الدعامة بتوصيلها بنقطة معدنية في السيارة وذلك باستعمال سلك تأريض الشاسي المجهز Ⓐ
قم بتوصيل سلك التأريض بالدعامة بواسطة القطعة Ⓑ كما هو موضح بالرسم



To a metal point of the car
A un point métallique de la voiture
A un punto de metal del automóvil
Arabanın metal bir noktasına.
do dowolnego metalowego elementu pojazdu
към метална повърхност от автомобила

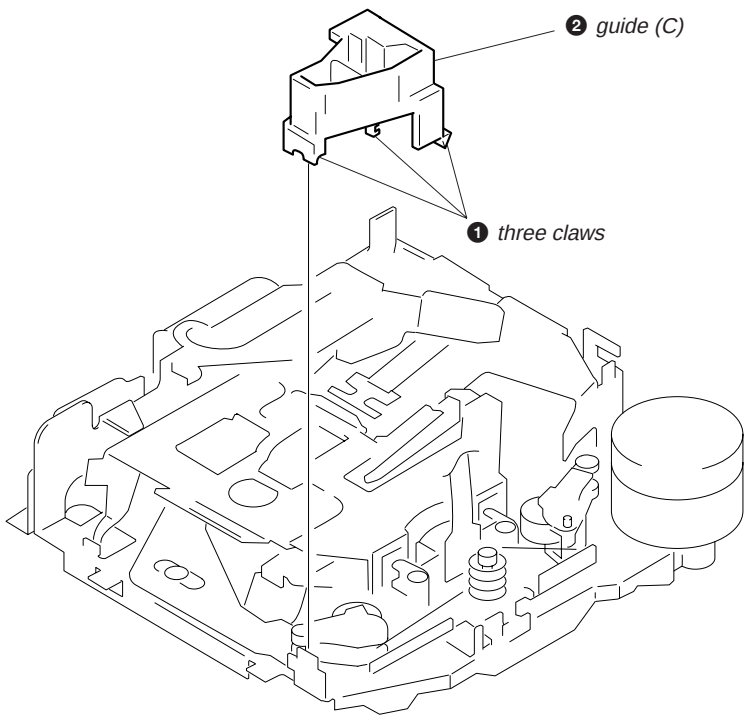
❹ Align hole in the gear (LDG-D) with △ mark on the lever (LDG-A).

GUIDE (C)



SECTION 4
MECHANICAL ADJUSTMENTS

1. Clean the following parts with a denatured-alcohol-moistened swab:
   playback head pinch roller
   rubber belt capstan
   idler
2. Demagnetize the playback head with a head demagnetizer.
3. Do not use a magnetized screwdriver for the adjustments.
4. The adjustments should be performed with the power supply voltage (14.4V) unless otherwise noted.

• Torque Measurement

Mode	Torqu Meter	Meter Reading
Forward	CQ-102C	35–65 g•cm (0.49–0.90 oz•inch)
Forward Back Tension	CQ-102C	0.5–5.0 g•cm (0.01–0.07 oz•inch)
Reverse	CQ-102RC	35–65 g•cm (0.49–0.90 oz•inch)
Reverse Back Tension	CQ-102RC	0.5–5.0 g•cm (0.01–0.07 oz•inch)
FF, REW	CQ-201B	60–200 g•cm (0.83–2.78 oz•inch)

• Tape Tension Measurement

Mode	Torqu Meter	Meter Reading
Forward	CQ-403A	more than 60 g (more than 2.12 oz)
Reverse	CQ-403R	

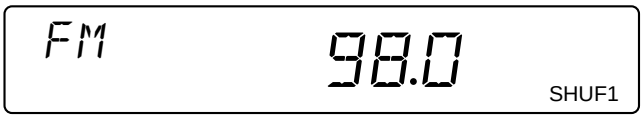
SECTION 5
ELECTRICAL ADJUSTMENTS

TEST MODE

This set have the test mode function. In the test mode, FM Auto Scan/Stop Level and MW Auto Scan/Stop Level adjustments can be performed easier than it in ordinary procedure.

<Set the Test Mode>
1. Set the “OFF” mode.
2. Push the preset [4] button.
3. Push the preset [5] button.
4. Press the preset [1] button for more than two seconds.
5. Push the [SOURCE] button, the test mode is set.

display



<Release the Test mode>
1. Push the “OFF” button.

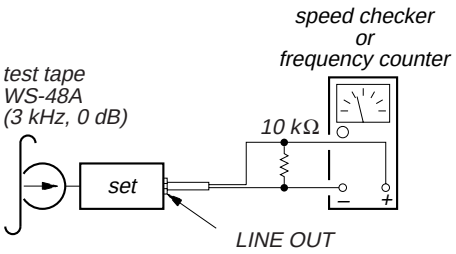
See the adjustment location from on page 21 for the adjustment.

TAPE DECK SECTION | **0 dB=0.775 V**

Tape Speed Adjustment

Procedure:

1. Put the set into the FWD PB mode.



Specification: Constant speed

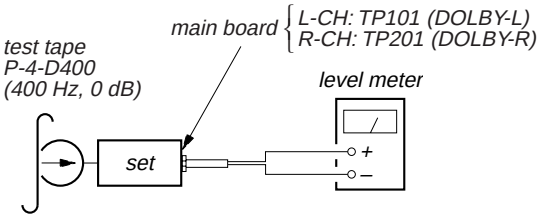
Speed checker	Frequency counter
–1.5 to +2.5%	2,955 to 3,075 Hz

Adjustment Location: See page 21.

DOLBY Level Adjustment

Setting:

Preset 3 (DOLBY) button	:	OFF
SEL (BAS) button	:	Center
SEL (TRE) button	:	Center
SEL (BAL) button	:	Center
SEL (FAD) button	:	Center
SEL (VOL) button	:	Maximum
D-BASS control	:	OFF



Procedure:

1. Put the set into the FWD PB mode.
2. Adjust RV121 (L-CH) and RV221 (R-CH) so that the level meter reading is –6 ± 0.5 dB (0.37 to 0.41 V).

Adjustment Location: See page 21.

TUNER SECTION | **0 dB=1 µV**

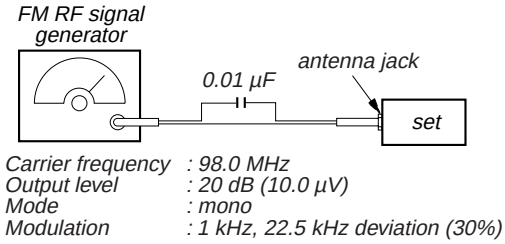
Cautions during repair

When the tuner unit is defective, replace it by a new one because its internal block is difficult to repair.

FM Auto Scan/Stop Level Adjustment

Setting:

SOURCE button: FM

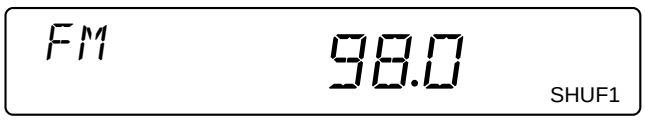


Carrier frequency : 98.0 MHz
Output level : 20 dB (10.0 µV)
Mode : mono
Modulation : 1 kHz, 22.5 kHz deviation (30%)

Procedure:

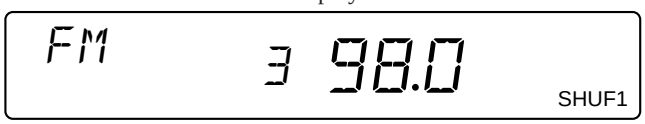
1. Set to the test mode. (See page 17).

Display



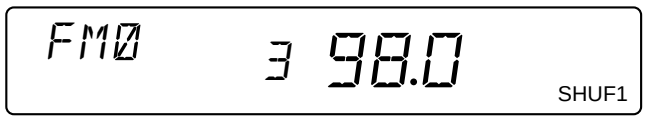
2. Push the preset 3 button.

Display



3. Adjust with the volume RV2 on TU1 so that the “FM” indication turns to “FM0” indication on the display window.
   But, in case of already indicated “FM0”, turn the RV2 so that put out light “0” indication and adjustment.

Display

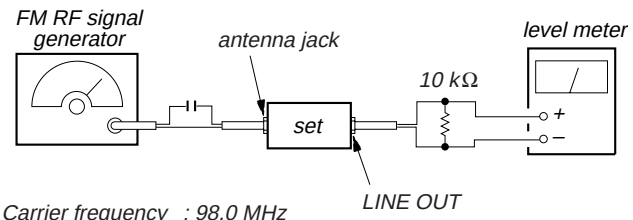


Adjustment Location: See page 21.

FM Stereo Separation Adjustment

Setting:

SOURCE button: FM



Carrier frequency : 98.0 MHz
Output level : 70 dB (3.2 mV)
Mode : stereo
Modulation : main: 1 kHz, 33.75 kHz deviation (45%)
sub: 1 kHz, 33.75 kHz deviation (45%)
19 kHz pilot: 7.5 kHz deviation (10%)

Procedure:

FM Stereo signal generator output channel	Level meter connection	Level meter reading (dB)
L-CH	L-CH	Ⓐ
R-CH	L-CH	Ⓑ Adjust RV4 on TU1 for minimum reading.
R-CH	R-CH	Ⓒ
L-CH	R-CH	Ⓓ Adjust RV4 on TU1 for minimum reading.

L-CH Stereo separation: Ⓐ-Ⓑ
R-CH Stereo separation: Ⓒ-Ⓓ
The separations of both channels should be equal.

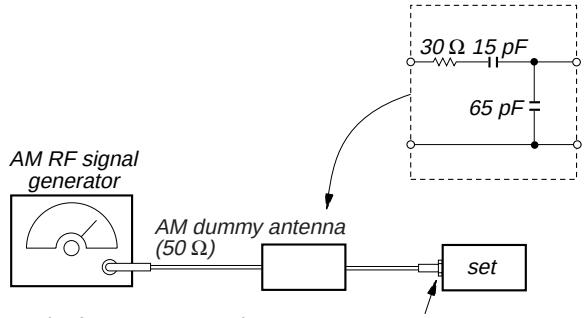
Specification: Separation more than 26 dB

Adjustment Location: See page 21.

MW Auto Scan/Stop Level Adjustment

Setting:

SOURCE and MODE button: MW

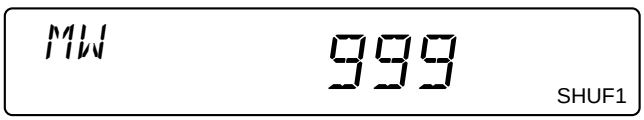


Carrier frequency : 999 kHz
30% amplitude modukation by 1 kHz signal
Output level : 33 dB (44.7 µV)

Procedure:

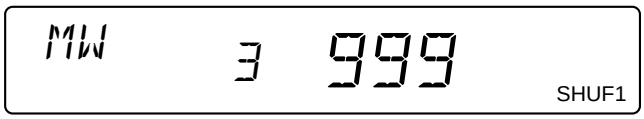
1. Set to the test mode. (See page 17.)
2. Push the MODE button and set to MW.

Display



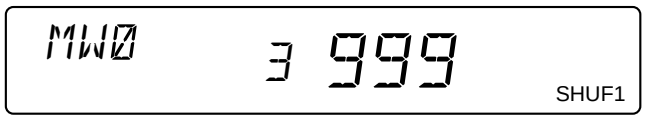
3. Push the preset 3 button.

Display



4. Adjust with the volume RV1 on TU1 so that the “MW” indication turns to “MW0” indication on the display window. But, in case of already indicated “MW0”, turn the RV1 so that put out light “0” indication and adjustment.

Display

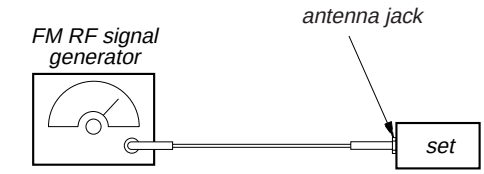


Adjustment Location: See page 21.

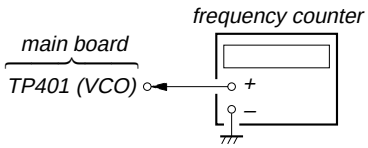
FM Polar VCO Adjustment

Setting:

SOURCE button: FM



Carrier frequency : 69.5 MHz (FM2: 3CH)
Output level : 60 dB (1 mV)



Procedure:

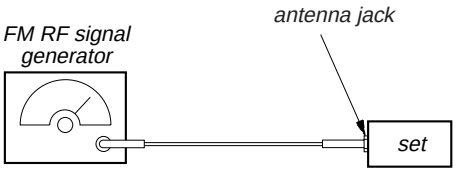
1. Connect the frequency counter to the TP401 (VCO) on main board.
2. Adjust RV402 so that the reading on the frequency counter becomes to 31.25 ± 0.1 kHz.

Adjustment Location: See page 21.

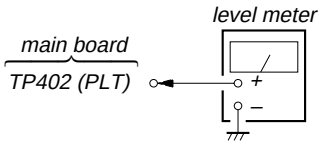
FM Polar Pilot Adjustment

Setting:

SOURCE button: FM



Carrier frequency : 69.5 MHz (FM2: 3CH)
Output level : 60 dB (1 mV)

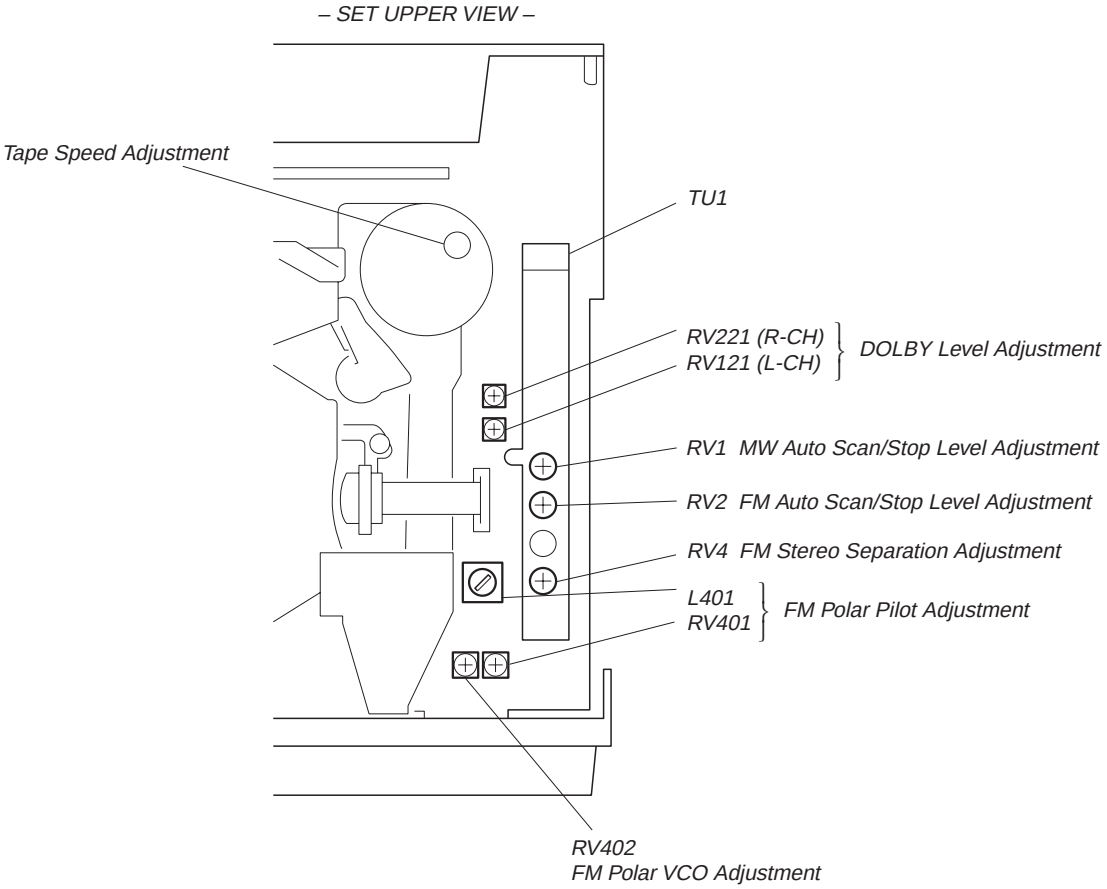


Procedure:

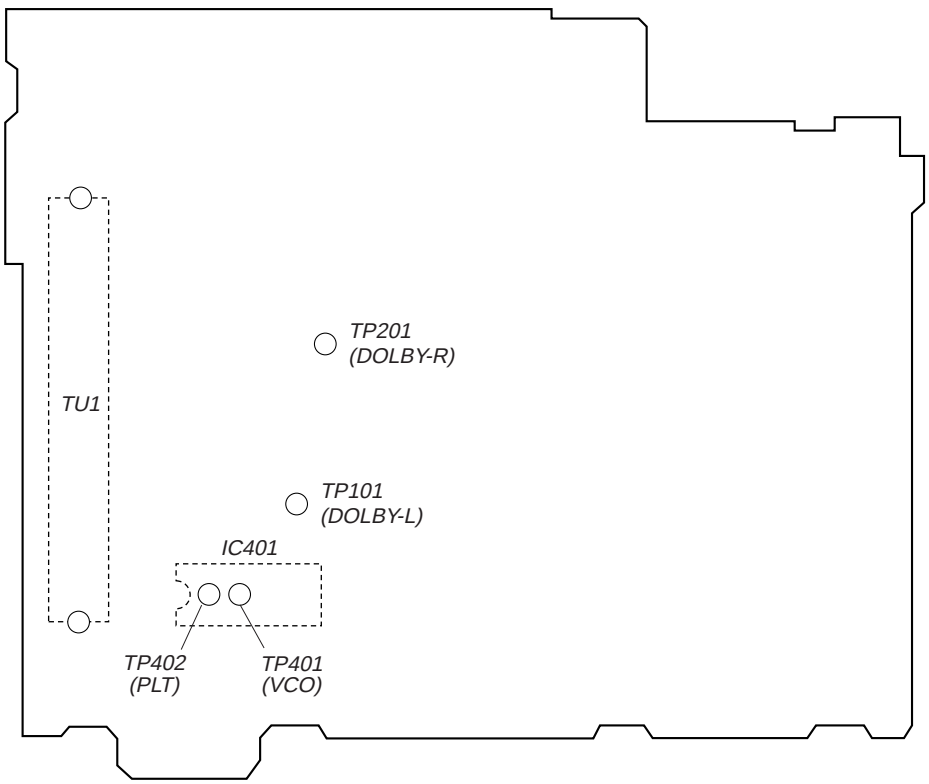
1. Connect the level meter to the TP402 (PLT) on main board.
2. Set the modulation frequency of the FM RF signal generator to 1 kHz (10 kHz div.)
3. Then output level is supposing that 0 dB.
4. Set the modulation frequency of the FM RF signal generator to 31.25 kHz (10 kHz div.).
5. Adjust L401 so tha the reading on the level meter becomes to maximum.
6. Adjust RV401 so that the reading on the level meter becomes to 13.0 ± 0.5 dB.

Adjustment Location: See page 21.

Adjustment Location:



[MAIN BOARD] (CONDUCTOR SIDE)



SECTION 6
DIAGRAMS

6-1. IC PIN FUNCTION DESCRIPTION

MAIN BOARD IC701 µPD78058GC-464-3B9 (SYSTEM CONTROL)

Pin No.	Pin Name	I/O	Function
1	DSEL1	I	Destination setting terminal (fixed at center voltage)
2	RCIN0	I	Rotary remote commander shift key A/D input terminal
3	SD_IN	I	Station detector detect input from the FM/AM tuner unit (TU1) Stop level for SEEK, BTM, etc. is determined SD is present at input of "H"
4	AVSS	—	Ground terminal (for A/D converter)
5	$\overline{ST}$	I/O	Input of FM stereo detection signal from FM/AM tuner unit (TU1), and output of forced monaural control signal to FM/AM tuner unit (TU1) (Commonly used for stereo display input and forced monaural output) FM stereo detection at input of "L", forced monaural at output of "L"
6	PLL-CE	O	PLL serial chip enable output to the FM/AM PLL (IC31)
7	AVREF	I	Reference voltage (+5V) input terminal (for D/A converter)
8	PLLSI	I	PLL serial data input from the FM/AM PLL (IC31)
9	PLLSO	O	PLL serial data output to the FM/AM PLL (IC31)
10	PLLCKO	O	PLL serial data transfer clock signal output to the FM/AM PLL (IC31)
11	$\overline{P\text{-}ST.IN}$	I	Polar stereo signal input from the polar multiplexer (IC401)
12	LCDSO	O	Serial data output to the liquid crystal display driver (IC901)
13	LCDCKO	O	Serial data transfer clock signal output to the liquid crystal display driver (IC901)
14	LCD-CE	O	Chip enable output to the liquid crystal display driver (IC901)
15	$\overline{LCD\text{-}INH}$	O	Blank indicate control signal output to the liquid crystal display driver (IC901) "L": no display
16	UNI-SI	I	Serial data input from the bus interface (IC571) (for SONY bus)
17	UNI-SO	O	Serial data output to the bus interface (IC571) (for SONY bus)
18	UNI-CKI	I	Serial data reading clock signal input terminal
19	UNI-CKO	O	Serial data transfer clock signal output to the bus interface (IC571) (for SONY bus)
20	$\overline{BUS\text{-}ON}$	O	Bus on/off control signal output to the bus interface (IC571) (for SONY bus) "L": bus on
21	$\overline{SYS\text{-}RST}$	O	Reset signal output to the bus interface (IC571) (for SONY bus) "L": reset
22	AMPON	O	Standby control signal output to the power amplifier (IC471)
23	$\overline{AMP\text{-}MUTE}$	O	Muting control signal output to the power amplifier (IC471)
24	TUN-ON	O	Tuner system power supply on/off control signal output to the BA3918 (IC601) "H": tuner on
25	FM-ON	O	FM system power supply on/off control signal output to the BA3918 (IC601) "H": FM on
26	PW-ON	O	Main system power supply on/off control signal output to the BA3918 (IC601) "H": power on
27	COLOR	I	Input terminal to set whether the illumination color change function is present or not "L": illumination color change function is present (fixed at "L")
28	$\overline{AMS\_ON}$	O	Tape auto music sensor control signal output to the CXA2510Q (IC101) "L" is output to lower the gain for audio level at FF/REW
29	REL	I	Reel table rotation detect signal input from the take-up and supply reel sensor
30	MTLIN	I	Input terminal to set whether the auto metal function is present or not "L": auto metal function is present
31	POS3	I	Tape position detect input from the tape operation switch (S901)
32	POS2	I	
33	GND	—	Ground terminal
34	POS0	I	Tape position detect input from the tape operation switch (S901)
35	POS1	I	

Pin No.	Pin Name	I/O	Function
36	LM_LOD	O	Loading/tape operation motor (M902) control signal output to the MM1322XF (IC651) (For the loading direction and forward side operation) *1
37	LM_EJ	O	Loading/tape operation motor (M902) control signal output to the MM1322XF (IC651) (For the eject direction and reverse side operation) *1
38	N/R_OUT	O	Forward/reverse direction control signal output to the CXA2510Q (IC101) "L": forward direction, "H": reverse direction
39	NC	I	Not used (open)
40	CMON	O	Capstan/reel motor (M901) drive signal output terminal "H": motor on
41	TAPEON	O	Tape system power supply on/off control signal output terminal "H": tape on
42	COL_SEL	I	Setting terminal for the illumination color "L": amber, "H": green (fixed at "H")
43	RCIN1	I	Rotary remote commander shift key A/D input terminal
44	$\overline{\text{TEST}}$	I	Setting terminal for the test mode "L": test mode (normally fixed at "H")
45	ILL-ON	O	Power supply on/off control signal output terminal at the illumination and liquid crystal display driver (IC901) "H": power on
46	BEEP	O	Beep sound output terminal
47	MUTE	O	Muting control signal output terminal "H": mute on
48	VOLCE	O	Chip enable output to the electrical volume (IC301)
49	SUBCE	O	Chip enable output terminal Not used this set (open)
50	VOLCKO	O	Serial data transfer clock signal output to the electrical volume (IC301)
51	SUBCKO	O	Serial data transfer clock signal output terminal Not used this set (open)
52	VOLSO	O	Serial data output to the electrical volume (IC301)
53	TAPMUT	O	Tape mute on/off control signal output to the CXA2510Q (IC101) "H": tape mute on
54	DOLON	O	Dolby on/off control signal output to the CXA2510Q (IC101) "H": dolby on
55	DOLBC	I	Setting terminal for dolby type "L": dolby B and C type, "H": dolby B type only (fixed at "H")"
56	$\overline{\text{AMSIN}}$	I	Whether a music is present or not from CXA2510Q (IC101) is detected at auto music sensor "L": music is present, "H": music is not present
57	MTL-SEL	O	Tape metal position control signal output to the CXA2510Q (IC101) "H": metal on
58	$\overline{\text{AD\_ON}}$	O	Power supply on/off control signal output for the A/D converter "L": power on
59	RAMBU	I	Internal RAM reset detection signal input Input terminal to check that RAM data are not destroyed due to low voltage This checking is made within 100msec after reset
60	$\overline{\text{RESET}}$	I	System reset signal input "L" is input for several 100msec after power on, then it changes to "H"
61	SIRCS	I	Sircs signal input terminal Not used this set (fixed at "H")
62	BUIN	I	Battery detect signal input terminal "H": battery on
63	PW-SEL	I	Power select switch input terminal "L": off (halt mode), "H": on (operation mode)
64	$\overline{\text{ACCIN}}$	I	Accessory detect signal input terminal "L": accessory on
65	$\overline{\text{NOSESW}}$	I	Detects the removal of the attaching and removing type front panel block "L": attaching
66	$\overline{\text{TELMUTE}}$	I	Telephone mute signal input terminal At input of "L", the signal is attenuated by –20dB
67	KEYACK	I	Input of acknowledge signal for the key entry Acknowledge signal is input to accept function and eject keys in the power off status On at input of "L"

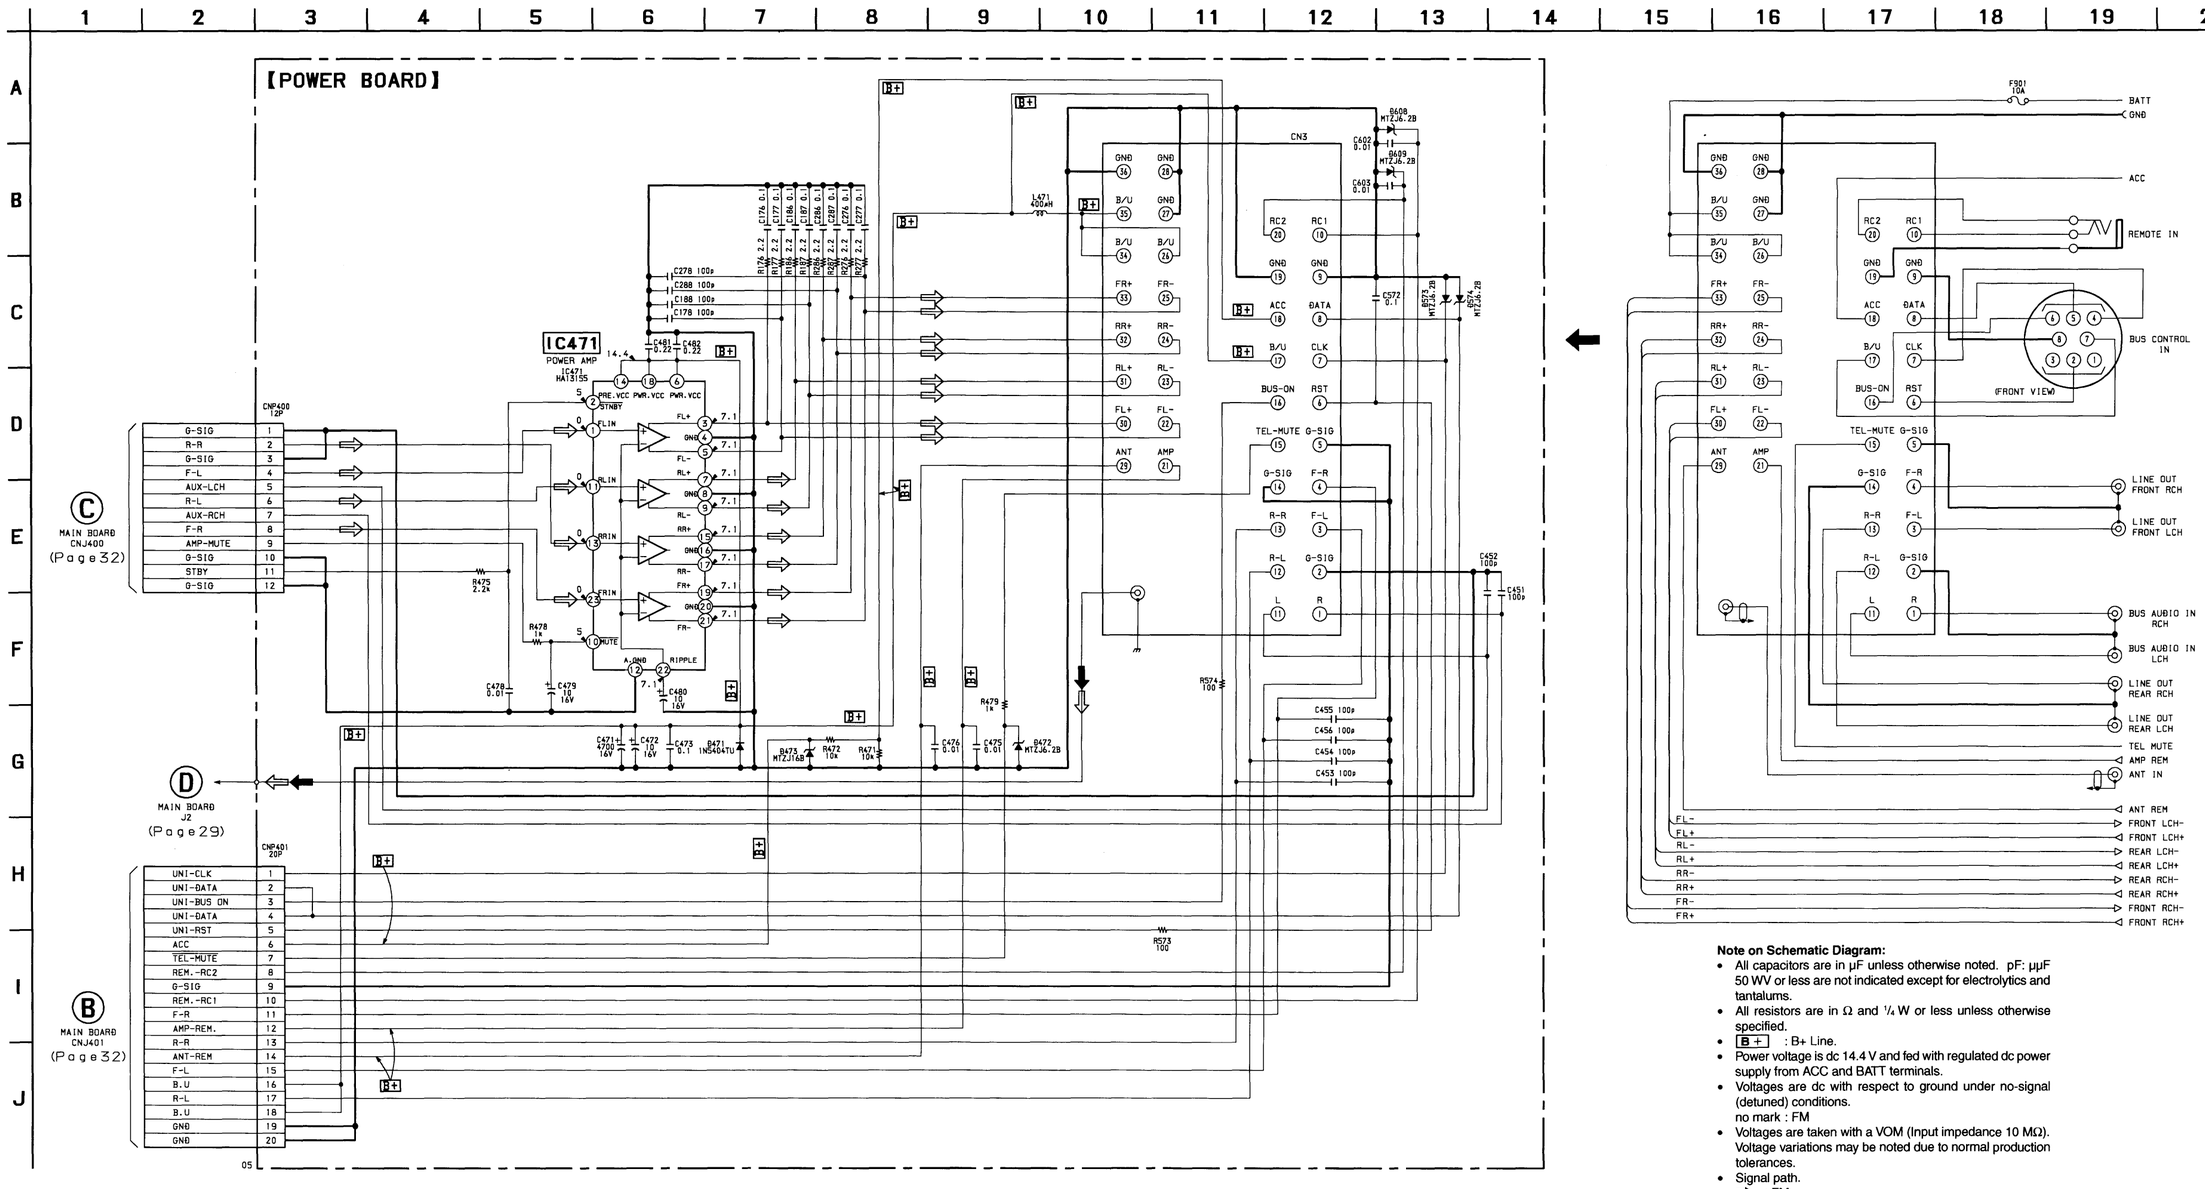
6-5. SCHEMATIC DIAGRAM – POWER Section –



Note on Schematic Diagram:

- All capacitors are in µF unless otherwise noted. pF: µµF 50 WV or less are not indicated except for electrolytics and tantalums.
- All resistors are in Ω and 1/4 W or less unless otherwise specified.
- B+ : B+ Line.
- Power voltage is dc 14.4 V and fed with regulated dc power supply from ACC and BATT terminals.
- Voltages are dc with respect to ground under no-signal (detuned) conditions.
  no mark : FM
- Voltages are taken with a VOM (Input impedance 10 MΩ). Voltage variations may be noted due to normal production tolerances.
- Signal path.

SECTION 8
ELECTRICAL PARTS LIST

CONTROL

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX and -X mean standardized parts, so they may have some difference from the original one.
- RESISTORS
  All resistors are in ohms.
  METAL: Metal-film resistor.
  METAL OXIDE: Metal oxide-film resistor.
  F: nonflammable
- Items marked "*" are not stocked since they are seldom required for routine service.
  Some delay should be anticipated when ordering these items.
- SEMICONDUCTORS
  In each case, u: µ, for example:
  uA. . : µA. . uPA. . : µPA. .
  uPB. . : µPB. . uPC. . : µPC. .
  uPD. . : µPD. .
- CAPACITORS
  uF: µF
- COILS
  uH: µH

When indicating parts by reference number, please include the board.
